# Abstract

This is my abstract. This is what I've spent the last  $x$  years working on, and I'm going to tell you about now.

# Statement of Originality

This work has not previously been submitted for a degree or diploma in any university. To the best of my knowledge and belief, the thesis contains no material previously published or written by another person except where due reference is made in the thesis itself.

Any contribution by other people, including co-authors of papers, has been clearly stated in the Authorship Contribution Statements.

## Introduction

This is not a very interesting introduction, however, every thesis probably needs one.

## Another Chapter

It's likely that you'll need another chapter, so here's a filler just to see where it will go [1].

*If cats looked like frogs we'd realize what nasty, cruel little bastards they are. Style. That's what people remember.*

## Conclusion

Not a very interesting conclusion. You'll need a better one for *your* thesis.

## An Appendix

This is an appendix. Add anything in here that you need in an appendix.

# List of Symbols

The following list is neither exhaustive nor exclusive, but may be helpful.

$a, b, c, d \dots$  annihilation operators

$a^\dagger, b^\dagger, c^\dagger, d^\dagger$  creation operators
